Profile

Pairing emotional intelligence with a strong foundation in full-stack development, I am passionate about applying technology to solve meaningful problems. I enjoy projects that use well-suited tools and keep human benefit at the forefront.

Skills

Programming Languages and Frameworks:

- Languages: Javascript, Python, Typescript, Dart, HTML/CSS
- Frameworks/Tools: React, Redux, Django, Flutter, Flask, Node.js, Express, Apollo
- Databases: PostgreSQL, Sequelize, SQLAlchemy, MongoDB, Mongoose, TypeORM, GraphQL
- CSS Frameworks: Tachyons, Material UI, Materialize

Programming

Freelance

- Seattle Dharma Center (<https://www.seattleDharmaCenter.com>)

Web-Development Immersive — GENERAL ASSEMBLY, Seattle, WA (November 2018-March 2018)

- Project 1: BeeFree (<https://009kings.github.io/beeFree/>)
Using JS, CSS, HTML5 Canvas, and custom art assets, created a cute, fun web platformer game that can be enjoyed with challenge or in zen mode.
- Project 2: Spellword (<https://spellword.herokuapp.com/>)
Developed a full stack web application for creating and storing “Spellbooks” for Dungeons and Dragons characters. Queries the DnD5e API, uses a PostgreSQL/Sequelize backend and EJS in the front.
- Project 3: Syllaboard (<https://github.com/parkercouch/syllaboard-client>) — *Experiencing deployment bugs*
Collaborated on a group project intended to help organize deliverables for instructors and students at General Assembly. Uses MongoDB and TypeORM on the back end, React, Redux, and Material UI on the front end.
- Project 4: Dem Dice (https://github.com/009Kings/Dem_Dice)
Created a small dice-rolling mobile application. Uses Flutter and Dart.
- Hackathon: Gentrified Seattle (<https://seattle-gentrified.herokuapp.com/>)
Participated in a Hackathon collaboration with User Designers, a Data Scientist, and a fellow Software Engineer to create an informational website about gentrification in Seattle. Uses React, Mapbox, and Charts.js
